Subject: Still working that job

I saw something crazy on social media

This guy showed how working people
will NEVER have any extra money.

He started by showing that these people
Only get 2 paycheck each month.

...but the other days of the month there
Are bills being paid...

Food for the house

Gas for the car

Rent or Mortgage

Utility bills

Let's not forget about Streaming services

Netflix, Hulu, Disney Plus, and others

And other miscellaneous things
that happened throughout the month.

And this is not adding the kids into the equation.

By the end of the month you usually only have
maybe 5 dollars to your name before you're payed again.

...And guess what?

next month this cycle repeats itself
over again.

Now if you're ready to get OFF this hamster wheel
of repeating sadness then...

I want you to click the link below
for a breath or fresh air to help you see.

[a better way of making an extra income](#)

Best regards

Jerell
