

Checklist 7: Canva Shapes And Lines

Project Name: _____

Date: _____

Yes No

Click on Elements and then click on Shapes

Scroll down through all of the different shapes you can choose from and notice how some are solid colours and some are just a coloured boarder no colour in the centre

Create new page to create a new blank canvas

Create a new design

Click on a shape to add it to the blank canvas

Move the shape

Click and hold mouse down to move the position of the shape

Re-size the shape

Click in one of the corners and drag to re-size

Rotate the shape

Notes

Checklist 7: Canva Shapes And Lines

Click the small circle icon at the base of the shape when selected to rotate the shape

Change the colour of the shape

Click the shape to highlight it and then click on the colour box above your design and choose from a default colour or use the colour palette to find different shades.

Note: Some shapes have more than one colour i.e a solid colour and another colour for the boarder, these can both be changed by selecting the relevant colour box above your design.

Adjust layers

Add 2-3 shapes to the canvas and overlap them. Now click on one to highlight it and you will see an 'arrange' tab appear, click on the arrange tab and then move the shape forward and backward and you will see it move behind or in front of the other Shapes.

Add Lines

Did you change the color?

You can also find a selection of different lines that you can add to your designs, just click on Elements and then Lines.

Select the line you want to use

Click on the line you want to add to your design

Resize the line

Notes

Checklist 7: Canva Shapes And Lines

You can make the line longer, wider and you can rotate it.
