

## Checklist 20 - Reddit Content Creation

Project Name: \_\_\_\_\_ Date: \_\_\_\_\_

When you first arrive at the Reddit home page it may look a little overwhelming.

You will see an extensive list of posts that have been shared by users and it might look a little disorganised.

There are 2 types of entries on Reddit, these are Links and Discussions  
The majority of posts are links but you will see discussions with a small Aa icon

You will also see small play button icons that indicate these posts are videos or slides

When you click on the title then it will take you directly to the webpage or discussion that it links to

To the left of the post image you will see up and down arrows which is where people can up vote or down vote depending on whether they like the post or not

All discussions and links have an area where visitors can leave comments
