11 Create or join in conversations

Start conversations whether it is in your own reddits or when you comment on other people's. The more you interact with people and the more you provide value or ask questions then the more followers and comments you will also receive.

When you add content or post a comment aim to connect with people's emotions. This may be through posting something funny, sad, controversial or even asking for help with something. People will reply as they want to be recognised and seen to be helpful, funny or they want to prove a point.
