Project Name: \_\_\_\_\_ Date: \_\_\_\_\_

Most people think that YouTube is just a site where you watch and upload videos but don't really interact with people much. However, it is far more socially active than a lot of other sites.

The huge difference and massive benefit YouTube has over other social media sites is that people really connect with you more especially if you upload videos where you are on camera. They get to see you and get to know you a lot more than sites where you just post pictures and this builds that know, like and trust factor quicker than any others.

You don't need to be anyone special or look and act a certain way, just be yourself.

There are a lot of everyday people that have quite literally become famous and earn \$Millions just from posting their videos on YouTube.

You can also connect with other very influential people on YouTube who already have a huge following and build relationships and possible joint ventures.

Here are a few ways to engage more with your viewers;
